KEY SKILLS

Technical Skills: Python | MS SQL Server | NumPy | Pandas | Matplotlib | Seaborn | Scikit-learn | Exploratory Data Analysis (EDA) | Data Visualization | Machine Learning

Machine Learning Algorithms: Linear Regression | Logistic Regression | Decision Tree | Random Forest | K-Means Clustering

Statistical & Model Evaluation Concepts: Hypothesis Testing | Train-Test Split | Cross Validation | Accuracy | Precision | Recall | F1-Score | Confusion Matrix

Professional Skills: Communication Skills | Teamwork | Problem Solving

PROJECTS

Customer Churn Prediction

- Built ML models to predict customer churn using Python and Scikit-learn.
- Performed EDA, preprocessing, and model evaluation using classification metrics.

Cricket Player Segmentation using K-Means

- Applied K-Means clustering to segment cricket players based on performance statistics.
- Used feature scaling, Elbow Method, and data visualization for cluster analysis.
